

1. (Twice Amended) A complex comprising a negatively-charged organic complex and a charged antigen, where (A) said organic complex and antigen are electrostatically associated and (B) said complex generates a CTL response when administered to a mammal.

2. (Twice Amended) The complex according to claim 1 wherein said antigen is positively charged.

3. (Amended) The complex according to claim 2 wherein said antigen is a protein or derivative or equivalent thereof.

4. (Twice Amended) The complex according to claim 2 wherein said negatively-charged organic complex is an adjuvant or derivative or equivalent thereof.

5. (Twice Amended) The complex according to claim 2 wherein said antigen is a protein or derivative or equivalent thereof and said negatively-charged organic complex is an adjuvant or derivative or equivalent thereof.

6. (Twice Amended) The complex according to claim 5 wherein said adjuvant is a naturally negatively charged adjuvant which has been modified to increase the degree of its negative charge.

7. (Twice Amended) The complex according to claim 5 wherein said protein is a naturally positively charged protein which has been modified to increase the degree of its positive charge.

8. (Twice Amended) The complex according to claim 5 wherein said adjuvant is a naturally negatively charged adjuvant which has been modified to increase the degree of its negative charge and said protein is a naturally positively charged protein which has been modified to increase the degree of its positive charge.

9. (Twice Amended) The complex according to claim 5 wherein said adjuvant comprises a saponin.

10. (Twice Amended) The complex according to claim 5 wherein said adjuvant is a saponin complex.

11. (Amended) The complex according to claim 10 wherein said saponin complex is ISCOMATRIX™.

12. (Amended) The complex according to claim 5 wherein said adjuvant is comprises a phospholipid.

13. (Amended) The complex according to claim 12 wherein said phospholipid is a phosphoglyceride.

14. (Amended) The complex according to claim 13 wherein the phosphoglyceride is selected from the group consisting of phosphatidyl inositol, phosphatidyl glycerol, phosphatidic acid and cardiolipin.

15. (Amended) The complex according to claim 12 wherein said phospholipid is lipid A.

16. (Twice Amended) The complex according to claim 15 wherein the lipid A is selected from the group consisting of diphosphoryl lipid A and monophosphoryl lipid A.

17. (Twice Amended) The complex according to claim 1 wherein said complex induces a cytotoxic T-lymphocyte response.
